

# Aims and Objectives of the School Policy

*Schooling is no longer merely an academic endeavour. It also aims at sensitizing students towards their commitment to society and the globe as a whole. Gone are the days when schooling was restricted to knowledge and information only. Technological advancement in all fields has also impacted the functioning of teachers and school children, which in turn, has helped to bridge the gap between countries and continents.*

*Education is not just imparting knowledge but means a lot more than this. It aims at the overall personality development of the learners which is only possible when the school, the family and the society join hands together. It is not only the school's responsibility to look after the holistic development of a child. Parents, community and society also play an important role. Thus the school promotes family, school and community partnership and ensures that parents and society play an equal role in grooming the future citizens of the country.*

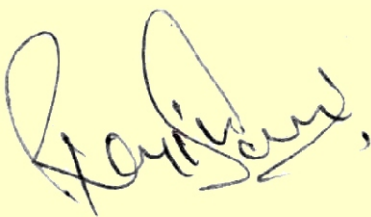

*In today's scenario, children are moving away from their culture and tradition in order to meet the global needs. Thus it becomes the sole objective of the school, the family and the society to ensure that the students do not forget their culture in the race of becoming global.*

*In tandem with the above, the need to expose students to a traditional experience in various fields has become almost mandatory and thus the Management and Staff of the Venkateshwar Global School have developed a Policy which would enable both the teachers and learners to add a cultural aspect to the global dimension of the school curriculum so as to help them:*

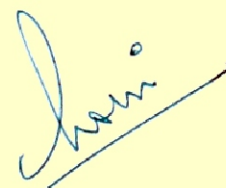

- develop curiosity and a strong awareness of similarities and differences in lifestyles and culture in a range of other countries*
- appreciate the rich and diverse cultural heritage, beliefs, values and languages of countries across the globe as compared with their own.*

- *understand and appreciate the complexities of interdependence of countries at a global level.*
- *reach out to their co partners in various fields across different countries and spread their culture and tradition.*
- *become sensitive to greater global issues related to environment, religion, culture, racial equality etc.*
- *appreciate and use ICT as an effective means to enhance communication skills, thus facilitating better information, knowledge and connectivity across the globe.*
- *share a common platform with students and teachers of other countries by way of international school partnerships and visits so as to enrich the school curriculum with the integration of the global dimension, as and when possible*
- *inculcate moral values and life skills in the learners and prepare them for their future life.*
- *review the Policy of the school on regular basis to update it to meet the latest cultural and global requirements and keeping our feet grounded in our roots of tradition and culture.*

*Every effort will be made by the Management, Staff and students of the Venkateshwar Global School to fulfill the aims and objectives of this policy document in letter and spirit.*
